

REVANTH KUMAR BANDI

Software Development Engineer | Full-Stack | MERN · Next.js · Node.js · TypeScript

Kandukur, Andhra Pradesh | +91 89783 91962 | bandi@revanthkumar.co.in | linkedin.com/in/revanthkumar66 | github.com/RevanthKumar66 | revanthkumar.co.in

PROFESSIONAL SUMMARY

Software Development Engineer (SDE) with hands-on experience in full-stack development using the MERN stack and Next.js. Proficient in building scalable web applications, RESTful APIs (Application Programming Interface), and responsive user interfaces with TypeScript. Skilled in continuous integration/continuous deployment (CI/CD) pipelines, role-based access control (RBAC), and JWT authentication. Strong foundation in JavaScript, React, Node.js, database design, and Agile/Scrum methodologies across the full SDLC — from system design to production deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Responsive Design, Server-Side Rendering (SSR), Static Site Generation (SSG)

Backend: Node.js, Express.js, REST APIs, Flask, Microservices Architecture, JWT Authentication, RBAC

Databases: MongoDB, MySQL, Redis (caching), PostgreSQL, Database Design & Optimization

DevOps & Cloud: AWS (Data Engineering, Cloud Foundations), Docker, Vercel, Render, CI/CD Pipelines, Git, GitHub

Testing & Tools: Jest, React Testing Library, Postman, VS Code, Integration Testing, Unit Testing

Core Concepts: Data Structures & Algorithms (DSA), System Design, Scalability, Distributed Systems, OOP, SDLC, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Development Engineer | **Deepvibe IT Solutions Pvt. Ltd.** | Hyderabad, Hybrid *Aug 2025 – Present*

- Engineered and deployed 3+ production-ready full-stack web applications using React, Node.js, Express.js, and MongoDB; architected RESTful APIs with JWT authentication, input validation, and error handling — reducing manual deployment effort by ~60% via Vercel CI/CD pipelines.
- Implemented microservices-style modular architecture and role-based access control (RBAC) across all products, improving system scalability, maintainability, and long-term reliability.
- Collaborated cross-functionally with designers and stakeholders to translate business requirements into responsive, high-availability full-stack solutions, improving user experience across all delivered products.
- Conducted code reviews, enforced consistent coding standards, and maintained unit testing practices (Jest) to ensure high code quality and scalability across the engineering team.

PROJECTS

Portfolio Website | *Next.js, TypeScript, SSR/SSG, Vercel, CI/CD* | revanthkumar.co.in

- Engineered a responsive portfolio achieving 95+ Google Lighthouse performance scores; implemented Server-Side Rendering (SSR) and Static Site Generation (SSG) for improved SEO and ~40% faster load times.
- Deployed with automated CI/CD pipelines on Vercel with next/font optimization and TypeScript strict mode for production-grade type safety.

Deepvibe IT Services Platform | *React, Node.js, Express.js, MongoDB, REST API, RBAC* | deepvibe.co.in

- Built a full-stack IT services web application with dynamic CMS-like content management system, RESTful API endpoints for admin dashboard and contact forms, and MongoDB persistence — reducing manual content update time by ~70%.
- Implemented role-based access control (RBAC) and JWT authentication; designed scalable database schema supporting concurrent users with optimized query performance.

Techworth IT Services Platform | *React, Node.js, Express.js, MongoDB, Vercel, REST API* | techworth.org.in

- Developed a scalable IT services platform with modular architecture and CMS capabilities; optimized API query indexing to reduce average response latency by ~35%.
- Deployed via Vercel with automated CI/CD; applied distributed data access patterns and database indexing strategies to ensure high availability under load.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2021 – 2025

PACE Institute of Technology and Sciences · Ongole, Andhra Pradesh · GPA: 8.15/10.0

INTERNSHIPS

Data Science Intern | **42Learn** | Remote

May 2024 – Jul 2024

- Performed exploratory data analysis (EDA) on 50,000+ record datasets using Python (Pandas, Matplotlib, Seaborn); engineered visualizations that surfaced actionable business insights for non-technical stakeholders.
- Developed interactive dashboards and automated reporting pipelines, reducing manual reporting effort by ~30% while improving data-driven decision-making.

Machine Learning Intern | **CodeTantra Tech** | Remote

Jun 2023 – Jul 2023

- Executed data preprocessing, feature engineering, and trained supervised ML classification models using Python and Scikit-learn, achieving 88%+ accuracy on validation datasets.
- Evaluated model performance using cross-validation and key metrics (precision, recall, F1-score); applied hyperparameter tuning to optimize prediction outcomes for production readiness.

CERTIFICATIONS

- AWS Data Engineering — **Amazon Web Services**
- AWS Cloud Foundations — **Amazon Web Services**
- Generative AI for Everyone — **IBM**
- Machine Learning with Python — **IBM**
- Fundamentals of Cybersecurity — **Palo Alto Networks**
- Next.js: Build Scalable React Apps with Page & App Routers — **Udemy**
- GIT, GitLab, GitHub Fundamentals for Software Developers — **Udemy**

ACHIEVEMENTS

- **1st Prize — Hackathon Coding Exam** | 42Learn AI/ML & Data Science Internship — Ranked 1st among all interns in a competitive coding assessment covering Python, machine learning algorithms, data structures, and algorithmic problem-solving.
